Plascon Etch Primer Has a New Look. The Trusted Formula Stays the Same.

Previously known as Coastcote Etch Primer and Steeltect 1400SB, Plascon Etch Primer continues to deliver reliable adhesion on galvanised iron, mild steel, aluminium, and general metal fabrication projects.

Available in White, Red Oxide, Matt Black, Blue Grey, Ivory and Jet Black

Available in: 1L, 5L, 25L and 200L

When paint starts peeling from metal surfaces, the problem usually begins underneath. Plascon Etch Primer has long been trusted by contractors, fabricators, workshops, and DIYers for its fast drying performance and strong adhesion on difficult metal substrates. Now available in updated packaging under the simplified name Etch Primer, the product remains the same proven primer used across everything from gates and burglar bars to structural steel, scaffolding, chassis components, and general fabrication work. Visit your nearest authorised Plascon Paint Expert store for expert advice on metal preparation, priming, and coating systems.
