WaterGuard All in One Pro

is a world-first waterproof powdered skim (patent pending). Easy to mix and apply, indoors or out, it creates a smooth, level surface for marble smooth paint finishes and wallpaper.

It can be applied directly over plaster, paint, dry walling and ceilings, providing a life-long durable moisture barrier and preventing or repairing damp and peeling paint and sealing parapet walls.

Also available in a textured finish to match rough plaster.

Key Features

► **Internal & External Use**

UV stable and suitable for moisture sensitive areas, bathrooms, wet-rooms, external walls and parapet walls.

► **High-Quality Finish**

It replaces Rhino/Gypsum skim for a durable, marble smooth waterproof skim for final paint and wallpaper finishes.

► **No Mess - No Fuss**

Unlike Rhino/Gypsum skim, there is no mess when applying. It can be used with confidence, in decorated rooms without damaging finishes.

► **Lightweight with Rheology**

Significantly lighter than traditional plaster skim, it maintains its shape during application and curing, eliminating sag.

TERACOAT

COATINGS SPECIALISTS

► **Multi-Functional Application**

Suitable to skim over smooth and rough plaster, stippled paint, gypsum, tiles (with primer), concrete, drywall, and ceiling boards.

► **Straighten walls**

Skim up to 3 mm per coat for perfectly true and plumb walls, easily overcoated and sanded for a beautifully smooth finish.

► **Waterproof Repairs**

Rising damp, parapet walls and negative or positive side waterproofing. Repairing bubbling paint and cracked plaster surfaces.

► **Excellent Adhesion**

Bonds strongly to all clean surfaces, new or old, including plaster, paint, tiles, drywall, ceilings or concrete.

► **Curing Time**

Speeds up overcoating and project completion by forming a moisture barrier between uncured surfaces and final finish.

► **Sanding**

Easily sanded for marble smooth finish and crisp clean edges.

► **DIY & Renovations**

Simple to use - just hand mix to a creamy consistency and use to cover plaster joints, blend plaster, patch corners and hide conduit patching.

► **Cost-Effective**

Powdered product eliminates transporting water, better spread rate, no wastage, multi-functional, long shelf life.

A History of Proven Performance

Our powdered waterproofing solution was developed as a moisture barrier over 50 years ago. In the last 8 years, Teracoat has modified and extensively tested **WaterGuard All In One Pro** as a premium waterproof finishing skim in Africa's challenging climate.

Environmental and Economic Benefits

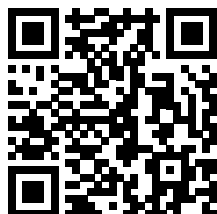

- ▶ Repairs and installation over existing surfaces avoids demolition waste and landfill contributions
- ▶ Product is water based and solvent free, no VOC off gassing.
- ▶ Components are local and naturally occurring reducing shipping costs and carbon footprints
- ▶ It is in a powdered format reducing transport costs
- ▶ Blended locally to encourage local employment and government incentives.
- ▶ Proudly made in South Africa.

WaterGuard All in One Pro is the only product on the market that offers an all-in-one solution for waterproofing, surface finishing, plaster and paint repair and can be applied over almost all construction substrates for a broad range of applications indoors and out.

By integrating durability, versatility, and sustainability, **WaterGuard All In One Pro** provides enduring protection against moisture and water-related problems, while achieving a smooth, professional finish suitable for decorating. This makes it an essential solution for reliable, sustainable construction and renovation projects worldwide.
